WEB APPLICATIONS / AUTOMATION / INTEGRATIONS

Siem Reap, Cambodia | Remote

elijah.rustycat@gmail.com | t.me/lacr0s | linkedin.com/in/iliaveshtort

PROFILE

I build web applications and workflow automation for small businesses: connect interfaces, APIs, data and Telegram, deploy services on Linux/VPS and support them after launch. My systems administration background helps me design services that remain practical to operate.

SELECTED PROJECTS

AUTO SERVICE WEBSITE + ORDER SYSTEM

Business project | Ongoing support

Built and maintain a public website and an internal order workflow for an operating auto service. Connected enquiries to order records and Telegram alerts; implemented role-based access, job statuses, scheduling and staff payment calculations.

Stack: Next.js, TypeScript, PostgreSQL, Prisma, Docker

HOMEASY - PROPERTY SEARCH MVP

Personal product | In development

Developing a property-search prototype that collects listing data, normalizes fields, detects duplicates, exposes data through an API and connects a Telegram bot with a Mini App. Focus: bringing data sources, backend logic and interface into one product.

Stack: TypeScript, Node.js, React, SQLite, Telegram

PROFESSIONAL EXPERIENCE

IT SUPPORT SPECIALIST | ARMAN IT SYSTEMS LLC

Apr 2024 - May 2026 | Systems administration duties

Supported infrastructure for 800+ users and automated recurring operations with PowerShell. Cut one RDS incident workflow from about 10 minutes to 1 minute and reduced offboarding access closure from 5-7 minutes to about 1 minute. Administered identity, network and business systems and handled incidents through ServiceDesk.

IT SUPPORT SPECIALIST

May 2022 - Sep 2023

Built Python utilities for Excel data processing; supported SaaS users and configured business workflows and automation. Assisted with Yandex Cloud VPS, Mango Office telephony and a WordPress website.

FROM REQUIREMENTS TO SUPPORT

Scope -> Architecture -> Implementation -> Verification

Deployment, monitoring and maintenance when required.

TECHNICAL SKILLS

WEB & DATA

TypeScript, JavaScript, React, Next.js, Node.js, SQL, PostgreSQL, SQLite, Prisma

AUTOMATION & APIS

n8n, Python, PowerShell, Bash, REST APIs, Telegram bots

DEPLOYMENT

Linux/Ubuntu, Docker/Compose, VPS, DNS, SSL/TLS, reverse proxy, Cloudflare

SUPPORT & RELIABILITY

Monitoring, logs, backups, updates, incident troubleshooting, ServiceDesk

EDUCATION

MOSCOW STATE TECHNICAL UNIVERSITY OF CIVIL AVIATION

Applied Mathematics and Computing / Information Security of Telecommunication Systems. Incomplete higher education, 2020.

GUSEV POLYTECHNIC COLLEGE

Technician-mechanic; industrial equipment installation and operation, 2010.

LANGUAGES

Russian - Native

English - B1

German - B1

WORKING APPROACH

Clarify the business task, choose a maintainable solution, integrate services, verify critical flows and stay responsible for deployment and post-launch support.
